PROFESSIONAL SUMMARY

Aspiring Software Developer with strong foundation in Python, Django, SQL, Data Structures, and OOP. Experienced in building end-to-end web applications and ML-based projects including a movie recommendation system and a GenAI image captioning application. Familiar with data analysis using Pandas, NumPy, and Scikit-learn. Seeking an entry-level Software Developer role to build efficient and scalable applications.

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Web Technologies: Django, Django REST Framework (DRF), HTML5, CSS3
Core Concepts: Data Structures, Algorithms, OOP, SDLC, MVC/MVT Architecture
Databases: SQL, MySQL, DBMS, Django ORM
ML & Data Science: Data Analysis (Pandas, NumPy), Basic Machine Learning, TF-IDF, CountVectorizer, Cosine Similarity, EDA
Tools & Platforms: Git, GitHub, Version Control, VS Code, Streamlit
Cloud: AWS (Basic - S3, EC2, Lambda, EBS)

PROJECTS

Movie Recommender System (ML + Streamlit) Feb 2025 – May 2025
Python | Pandas | NumPy | Scikit-learn | Jupyter Notebook | Streamlit
GitHub: Movie Recommender System

- Built a content-based movie recommendation system on the TMDB dataset processing 5,000+ movies across 6 features — title, genre, cast, crew, keywords, and overview.
- Implemented Count Vectorizer and Cosine Similarity to compute movie-to-movie similarity scores and generate top-5 personalized recommendations.
- Performed data cleaning and feature engineering using Pandas — merged 2 CSV files, handled null values, and extracted nested JSON fields from genre and cast columns.
- Deployed an interactive Streamlit web app allowing users to select any movie and retrieve top-5 recommendations instantly.

Restaurant Management Web Application (Django) Jul 2025 – Oct 2025
Python | Django | HTML | CSS | SQLite | Mailtrap SMTP
GitHub: Restaurant Management System

- Developed a full-stack restaurant management web application using Django supporting 3 core modules — menu browsing, table booking, and email notifications.
- Implemented Django MVT architecture across 5+ database models to cleanly separate application logic, data layer, and user interface.
- Engineered Django ORM operations managing 4+ entities — menu items, bookings, customer records, and order data stored in SQLite.
- Integrated Mailtrap SMTP ensuring 100% automated email confirmation delivery for every table booking request.

GenAI Powered Image Captioning Dec 2025 – Jan 2026
Python | Hugging Face Transformers | Gradio
GitHub: Image Caption Generator

- Developed an AI-powered image captioning system using the BLIP transformer model from Hugging Face to generate accurate descriptive captions for uploaded images.
- Integrated Hugging Face Transformers pipeline with the pre-trained BLIP vision-language model for image feature extraction and NLP-based caption generation.
- Engineered a Gradio UI delivering real-time captions in under 3 seconds, leveraging transfer learning to eliminate training from scratch.

EDUCATION

Master of Computer Applications (MCA) July 2024 – May 2026
Pimpri Chinchwad University, Pune, Maharashtra CGPA: 8.94

Bachelor of Computer Applications (BCA) Aug 2021 – May 2024
Aisect University, Hazaribag, Jharkhand CGPA: 8.14

CERTIFICATIONS

SQL – Coursera/IBM (2024) | Python with Generative AI – Coursera | DSA using C/C++ – Udemy | Python – Udemy (2024)
